

## Personal protective equipment

### Description

This is a complete kit with personal protective equipment with protection against both explosions, fragments and ballistic threats. The equipment is adapted for use in both EOD / demining operations and in tactical situations. The kit contains PASGT helmet with demining visor, body protection with groin and collar protection, ballistic plates to increase the level of protection, all packed in a custom carrying bag. The equipment is adapted to the Ukraine national mine action standard (NMAS) and meets international requirements at level of protection.
