

Tactical Hook and Line kit for deminers/EOD-operators

Description

For gaining access to hazardous areas.

This is a tactical kit with all the Hook and Line equipment that a deminer/EOD-operator needs in his/her daily work and it contains all components needed for remote movement and remote handling of objects. The equipment is packed in a functional carrying system so it can easily be carried to the clearing site. This kit is intended to contain all the necessary basic equipment for Hook and Line operations - everything is included. In this way, a large number of deminers/EOD-operators can easily be equipped and start the clearance/search work.
